**Super VHS**

JVC HR-S7000U

**JVC, the inventor of VHS, has done it again.** JVC has just come up with an astonishing new development that's going to take video by storm—it's called SUPER VHS.

**A New Definition in video**  
That's super VHS. Picture resolution like you've never seen it before. Over 400 lines of horizontal resolution—you're probably used to around 240—a new level of performance means a sharper, clearer picture than you've every seen on a video recorder.

**Taking VHS into the Future**  
JVC is making video history without making your current VHS tapes obsolete. You can still watch and make VHS recordings on super VHS decks. Super VHS—yet another extension of the potential of VHS. See it today, AUDIO SYSTEMS!!
